RITIK SOLANKI

Software Developer | Full-Stack (MERN) & AI/Agentic Systems
ritiksolanki726@gmail.com | +91 8435943098 | Indore, India
linkedin.com/in/ritik-solanki-9200a3210 | github.com/Ritiksolanki8435 | my-portfolio-mu-navy.vercel.app

PROFESSIONAL SUMMARY

Software Developer with 3.6 years of experience building scalable full-stack web applications across the MERN stack, with hands-on expertise extending into applied AI — Retrieval-Augmented Generation (RAG), vector databases, agentic tool-calling workflows, and MCP servers. Proven record of improving application performance, reliability, and user experience while shipping production features end-to-end, from architecture through deployment.

SKILLS

Languages & Frameworks: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, Redux, Redux Toolkit, jQuery, Node.js, Express.js, MongoDB, PostgreSQL, Supabase, GraphQL, REST APIs

Applied AI / Agentic Systems: Generative AI (GenAI), Retrieval-Augmented Generation (RAG), AI Agents & Function/Tool Calling, Exploring MCP (Model Context Protocol) Servers, Vector Databases (Pinecone, Vertex AI Vector Search, PostgreSQL pgvector), LLM Integration, Prompt Engineering

Tools & Platforms: Git, GitHub, Postman, Swagger, VS Code, Figma, Bootstrap, Material-UI, Responsive Web Design, Google Cloud Platform (Vertex AI, GCS), AWS (EC2, S3 - basics)

Professional: Cross-functional collaboration, mentoring junior developers, technical documentation, stakeholder communication, translating business objectives into technical solutions

PROFESSIONAL EXPERIENCE

Docusoft Solution India Pvt. Ltd. *August 2024 – Present | Indore, M.P.*

Software Developer

- Designed, developed, and optimized full-stack web applications, improving page load speed through efficient frontend architecture and code-splitting.
- Owned features across the full software development lifecycle — requirements, design, implementation, testing, and deployment — maintaining consistent delivery quality.
- Built and integrated AI-assisted features leveraging Retrieval-Augmented Generation (RAG) pipelines and vector databases to power intelligent document search and Q&A capabilities.
- Explored and prototyped agentic AI workflows using function/tool-calling to automate multi-step backend tasks and reduce manual intervention.
- Engineered reusable JavaScript, jQuery, HTML, CSS, and Bootstrap components, improving application efficiency and cross-team development velocity.
- Championed scalable, secure, and user-centric engineering practices, strengthening application reliability and reducing production issues.

Technomatz IT Solutions *March 2023 – August 2024 | Indore, M.P.*

Software Developer

- Designed and implemented responsive full-stack applications, reducing API response time through GraphQL query optimization.
- Optimized database queries and application state management, driving a meaningful improvement in overall system performance.
- Engineered UI/UX and full-stack features with a focus on scalability, applying code-splitting to optimize component load and rendering.
- Collaborated with cross-functional teams to establish best practices in JavaScript frameworks, API integration, and technical documentation.

PROJECTS

Kriyova AI — Configurable AI Chatbot as a Service *Full-Stack Developer (1 of 2 core developers)*

Tech Stack: Node.js, Express.js, TypeScript, Next.js, Supabase, PostgreSQL (pgvector)

- Co-developed a multi-tenant, configurable AI chatbot platform delivered as a service, built around AI agents and tools that clients can enable and tailor to their business.
- Enabled any client website to run its own chatbot by embedding a single script, designed as a secure, drop-in integration.
- Built the client module: profile management, document uploads to power chatbot knowledge, requests to enable or disable agents, and requests for new services.
- Built the admin module: view all client profiles, grant or revoke agent access, and generate manual bills and invoices.
- Implemented a scheduler that automatically generates monthly invoices based on each client's chatbot usage and sends them to the client.
- Currently leading the migration of agent tooling toward MCP (Model Context Protocol) servers.

DocuAssist — RAG-Powered Knowledge Assistant with Agentic Retrieval *Full-Stack Developer*

Tech Stack: Vertex AI, LLMs, Vector DB, Google Cloud Storage, Express.js, React.js

- Implemented a Retrieval-Augmented Generation (RAG) system on Google Vertex AI, enabling intelligent, context-aware Q&A over large document corpora.
- Designed function/tool-calling logic so the AI agent could dynamically query the vector store, fetch documents, and trigger corpus updates as needed.
- Automated corpus management to support multi-document uploads at scale — up to 10,000 documents across varied file types.
- Integrated Google Cloud Storage with automated import pipelines feeding the Vertex AI RAG vector index for scalable document storage.

Docusoft Practice — Enterprise Document & CRM Management Solution *Web Developer*

Live: https://docusoftpractice.com/

Tech Stack: HTML, CSS, JavaScript, jQuery, Third-Party Document Management Controls

- Built a document digitization platform with an integrated CRM, enabling seamless document storage and fast retrieval.
- Implemented portal messaging, task management, and attachment handling, enhancing team collaboration and tracking.
- Integrated a secure digital signature feature, greatly cutting manual paperwork and ensuring legally compliant approvals.

Unikaksha — E-Learning Platform *Frontend Developer*

Tech Stack: React.js, Redux, Material-UI

- Built the frontend of an e-learning marketplace connecting tutors and learners across multiple modules.
- Tutor side: interfaces for listing courses, setting slot availability, and managing students and courses.
- Learner side: course browsing with tutor and course filters to help learners find the right fit.
- Managed application state with Redux and built a consistent, responsive UI with Material-UI.

EDUCATION

B.Tech, Computer Science & Engineering — RGPV, Bhopal | 2019 – 2023 | CGPA: 8.0
12th (PCM), M.P. Board — 85.8%
10th, M.P. Board — 86.5%
